**RE: Pasta Kitchens/HMR Foods**  
**Concord, ON**

Dear Wayne:

Thank you for a job well done at the new Pasta Kitchens processing facility. Your superintendent, Fred Thomas, provided exceptional service and was cooperative and professional throughout the duration of the project, which included numerous changes issued by Millennium Engineering.

The \$2.6 million project (\$204,000. electrical scope) completed in 7 months on a '*Fast Track*' schedule consisting of the demolition and renovation of an existing 25,000 Sq.Ft. building allowed Pasta Kitchens to obtain C.F.I.A. (Canadian Food Inspection Agency) registration.

Wayne, once again I appreciate the excellent service provided by your company and would recommend you and your team as an efficient, cost effective electrical trade. We look forward to the opportunity of working with you again soon.

Yours truly
